DRAFT

OUR PROPOSED CHANGES

4. A system for determining eligibility of a participant in an insurance plan with respect to particular dental procedures performable by a dental care provider comprising:
- [at least one] a first computer having at least one data storage means, at least one input means, and at least one output means;
  - data pertaining to at least one participant stored in at least one database on the data storage means of [a] said first [of said at least one] computer wherein at least a portion of said data is not locally stored on [said first] a second computer;
  - means [associated with the at least one computer] for determining eligibility of the participant in real time comprising:
    - means associated with said second computer for inputting a participant identifier;
    - means associated with the second computer for inputting a particular procedure necessitated by a participant;
    - means associated with the first computer for searching the participant data stored in the at least one data storage means for the participant identifier; and
    - means associated with the first computer for providing the participant stored data pertaining to the participant identifier [to the output means of the at least one computer], to, in turn, provide data as to the eligibility of a participant for a particular procedure;
  - [said] second input means being associated with [at least] said [first] second computer for inputting an inquiry requesting information from said first computer pertaining to said particular dental procedure in order to access said participant data

in real time and determine eligibility for said particular procedure in real time prior to providing said procedure without the need to send participant's data to said [first] second computer from said data storage means in advance of said determination; and

- means associated with the [at least one] first computer for recording utilization of benefits by the dental provider in real time.

13. A method of providing information to dental care providers regarding a participant of an insurance plan of at least one carrier comprising the steps of:
  - determining eligibility of the participant comprising the steps of:
  - inputting identifier data pertaining to the participant on a first computer in the form of an inquiry in real time to at least one database containing participant data regarding a plurality of insurance carriers, wherein at least a portion of said participant data is stored remotely from said first computer;
  - searching for the identifier data in said participant data of said at least one database;
  - providing output in the form of participant data provided as a response to said inquiry in real time pertaining to the eligibility of the participant without the need to send the participant's data from the database in advance of said determination;
  - inputting a procedure code in real time to determine whether [the] a procedure associated with the procedure code is covered by the participant's plan prior to performing the procedure; and

- recording the utilization of benefits and claims in real time by way of a procedure by the dental care provider comprising the steps of:
- inputting an identifier data pertaining to the participant; and,
- inputting a performed procedure data.

EXAMINER'S SUGGESTIONS

4. A system for determining eligibility of a participant in an insurance plan with respect to particular dental procedures performable by a dental care provider comprising:
- [at least one] first computer having at least one data storage means, at least one input means, and at least one output means;
  - data pertaining to at least one participant stored in at least one database on the data storage means of [a first of said at least one] said first computer wherein at least a portion of said data is not locally stored on said first computer;
  - means associated with [the at least one] a second computer for determining eligibility of the participant in real time comprising:
    - means for inputting a participant identifier;
    - means for inputting a particular procedure necessitated by a participant;
    - means for searching the participant data stored in the at least one data storage means for the participant identifier; and
    - means for providing the participant stored data pertaining to the participant identifier [to the output means of the at least one computer], to, in turn, provide data as to the eligibility of a participant [for a] wherein said eligibility pertains only to said particular procedure;
  - said input means being associated with [at least said first] said second computer for inputting an inquiry requesting information pertaining to said particular dental procedure in order to access said participant data in real time and determine eligibility [for said] only ~~one~~ said particular procedure in real time prior to providing said

procedure without the need to send participant's data to said first computer from said data storage means in advance of said determination; and

- means associated with the at least one computer for recording utilization of benefits by the dental provider in real time.

13. A method of providing information to dental care providers regarding a participant of an insurance plan of at least one carrier comprising the steps of:
  - determining eligibility of the participant comprising the steps of:
    - inputting identifier data pertaining to the participant on a first computer in the form of an inquiry in real time to at least one database containing participant data regarding a plurality of insurance carriers, wherein at least a portion of said participant data is stored remotely from said first computer;
    - searching for the identifier data in said participant data of said at least one database;
    - providing output in the form of participant data provided as a response to said inquiry in real time pertaining to the eligibility of the participant without the need to send the participant's data from the database in advance of said determination;
    - inputting a procedure code in real time to determine whether [the] a procedure associated with the procedure code is covered by the participant's plan prior to performing the procedure; and
    - recording the utilization of benefits and claims in real time by way of a procedure by the dental care provider comprising the steps of:

- inputting an identifier data pertaining to the participant; and,
- inputting a performed procedure data.
